Summary

Full-Stack Developer shipping a multi-tenant school ERP SaaS end-to-end at an early-stage startup — frontend, backend, database design, releases, and production debugging. Mentored through rigorous PR reviews by engineers with 10–14 years of experience; build with AI tools (Gemini, Claude) in the loop, always under senior review. Document the work publicly in an engineering journal. Strong remote collaboration and Agile experience.

Skills

Programming: JavaScript, TypeScript, Python, C++, HTML, CSS
Frameworks/Libraries: Node.js, Express.js, React, React Native, Next.js, Bootstrap, Tailwind CSS
Database/Cloud: PostgreSQL, MongoDB, Firebase, REST APIs, Vercel
Tools: Git, GitHub, Jira, WebRTC, JWT, Zoho, VS Code, Gemini, Claude

Experience

Full Stack Developer Sep 2024 – Present
māhita technologies *Remote*

- Ship features end-to-end on a school ERP SaaS for Indian schools — React frontend, Node.js backend, and PostgreSQL/Firebase data layer — driven directly by what real schools ask for.
- Fixed a production billing bug by redesigning fee receipts to snapshot payment-time facts (JSONB) and store the rendered PDF (BYTEA), so historical receipts can never silently recalculate.
- Implemented server-side pagination contracts between frontend and backend, keeping list endpoints fast as school data scales.
- Revamped the official company website, improving performance scores by 40%; integrated WebRTC for real-time communication features.
- Own git workflows, deployments, and release process; debug live production issues during active school usage.

Content Administrator May 2025 – Present
māhita technologies *Remote*

- Created and managed LinkedIn content strategy, contributing to a 60% increase in engagement.
- Maintained alignment between brand messaging and platform communication.

Thumbnail Editor Jan 2025 – Present
YouTube *Freelance*

- Designed high-conversion thumbnails for creators with 7K+ and 21K+ subscribers; increased average CTR by 15%.

Projects

māhita School ERP | *React, Node.js, PostgreSQL, Firebase* 2024 – Present

- Multi-tenant SaaS ERP for Indian local schools — students, attendance, fees and receipts, subscriptions; I build and ship across every layer, from database design to releases and production support.
- Features driven directly by real school feedback, including snapshot-frozen fee receipts (JSONB + BYTEA) and server-side pagination across list endpoints.

Vinodam — Live Quiz Platform | *React, Firebase, real-time sync* 2026

- Real-time quiz platform for school events with three synchronized screens — admin control, projector display, and participant phones — with live scoring, timers, and leaderboards.
- Prototyped it solo in weeks, adopted as an official māhita product, and ran its first live event with 300 students flawlessly.

Education

B.Tech in Artificial Intelligence and Machine Learning 2021 – 2025
Sri Venkateswara College of Engineering and Technology, Srikakulam *Grade: 8.17/10*

Intermediate – MPC 2019 – 2021
Sri Chaitanya College, Palasa *Score: 92.9%*

Achievements

LinkedIn Influence: Built a community of 11,000+ followers by sharing technical tutorials and career content.
District First in Drawing: Secured first place in a district-level drawing competition.
